Dr.Oswald C

## TABLE OF CONTENTS

- **01** Project Overview
- 02 Design and Planning
- 03 Implementation
- 04 Deployment

### PROJECT OVERVIEW

- 1. **Personalized Learning**: To provide personalized language learning experiences by connecting learners with qualified tutors.
- 2. Efficient Scheduling: Implement a system for tutors to manage their availability and for students to schedule lessons conveniently.
- 3. Comprehensive Learning Resources: Offer a range of resources such as flashcards, interactive tools, and a community hub for enhanced learning.
- 4. Secure and Seamless Transactions: Integrate secure payment processing for lesson bookings and course enrollments.

### PROJECT OVERVIEW

#### TARGET AUDIENCE:

- Tutors: Language instructors who can create and manage courses, schedule lessons, and interact with students.
- **Students**: Individuals interested in learning languages, accessing course materials, and scheduling lessons with tutors.

#### **Project Goals:**

- Create an intuitive and user-friendly platform for language learning.
- Ensure secure and efficient communication and transaction processes.
- Facilitate interactive and engaging learning experiences for students and tutors alike.

### DESIGN AND PLANNING

SYSTEM DESIGN (TOOLS USED: VS CODE AND LANG-C++ AND GITHUB)

LINK: system design

INTERFACE DESIGN (TOOLS USED: FIGMA)

LINK: figma

PROJECT PLANNING (TOOLS USED: NOTION)

LINK: notion

### IMPLEMENTATION

CLASS DIAGRAM (TOOLS USED: LUCID CHART AND DIAGRAM.IO)

LINK: class diagram

USE CASE DIAGRAM(TOOLS USED: LUCID CHART AND DIAGRAM.IO)

LINK: use case diagram

**ACTIVITY DIAGRAM (TOOLS USED: FIGMA)** 

LINK: activity diagram

SRS (TOOLS USED: GOOGLE DOCS AND MS WORD)

LINK: srs

USER FLOW DIAGRAM (TOOLS USED: FIGJAM BOARD)

LINK: user flow diagram

### **DEPLOYMENT**

#### **CURRENT SETUP**

- Discord Channel (Separate Sections for Tutors and Students)(<u>Discord</u>)
- Docs Website (<u>User Guide</u>)

#### IN PROGRESS

• Full Stack Website Deployment

#### **FUTURE PLANS**

- Android and iOS App Development
- Dockerization and Containerization
- Cloud Server Setup
  - a.Load Balancer
  - b. Kubernetes Cluster
  - c.Proxy and Reverse Proxy (Nginx)
